

RIVERSIDE COMMUNITY PARTNERS

A Behavioral Health Community Partners Program

Riverside Community Partners is a community-based care coordination service to help MassHealth enrollees improve their health and reach their goals for quality of life and well-being.

Our Care Coordinators engage with enrollees and work collaboratively with medical, behavioral health providers, and community organizations to support our enrollees by integrating their care.

How We Improve Patient Outcomes

- Coordinate communication between enrollees and care team providers
- Reduce missed appointments by assisting enrollees with scheduling, transportation, and other supports
- Help enrollees understand and manage their prescription medications
- Connect enrollees to social and community supports, including housing assistance, food stamps, and in-home services
- Provide health and wellness coaching for enrollees or support their wellness goals by connecting them to nutrition or smoking cessation services

The Physician's Role in the Community Partners (CP) Program

We need your help! Here is how you can ensure your patients are able to receive care coordination services:

- Participate in the care planning process
- Review and sign your patient's person-centered treatment plan
- Provide us with updated medical history or contact information as needed
- Encourage your eligible patients to enroll in the CP Program
- Contact us if you notice a CP member has an unmet need

Members are far more likely to engage with this program when their physicians encourage their enrollment.

Who We Serve

Riverside Community Partners serves adult MassHealth members who are enrolled in a MassHealth ACO or MCO and have significant behavioral health and/or complex medical needs including serious mental illness and addiction. In addition, members who receive services in the Department of Mental Health's Adult Community Clinical Services (ACCS) are also eligible for services.

How To Refer a Patient

If you think that your patient would benefit from care coordination services, call us at: 781-619-5000 or email BHCP_Admin@riversidecc.org.

We can help you submit a request on behalf of your patient to their ACO for community partner services.
